

## **Summary**

Sierra Leone, West Africa has gone through a lot of natural disasters over the past years, such as, the spread of Ebola diseases, Mudslide from heavy rain flood, 11 years of rebel war, climate change and Covid-19 as to name a few. Today the shortage of water in communities is overwhelming.

Our mission is to build water-wells and hand-pumps to bring clean water to schools, medical facilities, farmers as to name a few. The need is great! But, we believe we can end the water crisis with your help.

## **Challenge**

We created "The Water-well Project" to build 15 water-wells with hand pump devices for the people living in the Communities (Sierra Leona-West Africa). Our team efforts are to prevent communities from being forced to drink dirty water due to climate change. Our goal is to aid these families and farmers in crisis, gain access to clean water and healthy sanitation practices by building water-wells.

## **Solution**

Kaddra Farm Inc. is a 501(c) (3) non-profit organization, striving to excel in agriculture industry and also targeting developmental programs in the communities.

Our Tax identification number is 30-0578148 and all donations are tax deductible. If your contribution exceeds \$250.00 please provide us with your name, mailing address and occupation.
